We've been helping professional owner-drivers grow their businesses since 2000, **putting you in front of the UK's largest member-only network of courier and freight transport companies.** Courier Exchange helps you to **maximise your potential** through a range of proven solutions including a GPS-enabled mobile app. Our powerful online platform is backed up by a dedicated team of experienced account managers who are on hand to guide you through the many opportunities that the Exchange presents.

## Why join?

- Find more jobs, fill your van and **stop losing money** on empty mileage.
- Receive **real-time access** to our online **trusted trading community**, where suitable loads are sent directly to your mobile phone.
- Significantly **increase your own business opportunities** by working with a network of like-minded professional courier businesses.

## How does it work?

- Enter your location, vehicle size and availability status into our online system.
- Companies enter the loads they need covered and the system automatically matches them to your availability and notifies you in real-time via email or SMS alert to your mobile phone.
- Negotiate your price directly with the Company, use our billing system for your invoicing, add your feedback about the transaction.

“ Over the recent years, the Exchange has helped us increase our profit margins, reduced our empty mileage running and hopefully helped other owner drivers and companies do the same. ”

Paul Speight

“ A big thank you to Courier Exchange in helping me make my courier business grow and make new contacts. ”

David Twist

## Online or Mobile?

Use our mobile phone app on the move to register your availability in real-time, so that you don't drive empty. For further details about the mobile app, see: [www.courierexchange.mobi](http://www.courierexchange.mobi)

This app is currently available for Android phones and iPhone.
