

# Owner-driver dashboard launched

**Transport Exchange Group has launched an online dashboard for owner-drivers.**

**It is available to individual members of its Haulage Exchange and Courier Exchange brands and allows operators to advertise vehicle availability and return journeys, as well as give them an overview of recent booking activity and feedback. It also provides an overview of the driver's compliance documents using a traffic light system to notify them of documents that are about to expire.**

**The group is also planning a similar dashboard for firms to include graphical reports on user activities and rolling gross profit margins.**

**Transport Exchange Group MD Lyall Cresswell said: "The dashboard provides information to put them in complete control and ensure we continue to deliver a useful service to our members."**
